Part 4

WRITING Maximum points – 20

Teachers play the most crucial role in building a country's foundation by enriching the country's future generation with their knowledge. They are essential to success and progress. An ideal teacher is always passionate and updated about his allotted subject, which helps in motivating children. They are pillars of the future of any country. A primary characteristic of an ideal teacher would be their own expertise.

They would be passionate about this subject, and that passion would encourage students to work hard in the ideal teacher's class. If they are well-aware of their subject, it makes them self-confident.

This confidence shows on the teacher's face and in their behavior towards students, which would also help in creating an excellent first impression. Being an ideal teacher would not be limited merely to teaching – it would also extend to being a mentor and guardian to students, helping them with whatever problems they have.
